IFRS 9 - Financial Instruments

Debt instruments are measured initially at amortized cost using the effective interest method. Upon initial adoption of the policy, any increase or decrease to the fair value of future cash flows of debt instruments is charged to opening retained earnings. Subsequent to initial recognition, the fair value of the debt instrument charge is amortized over the remaining term of the debt instrument through the consolidated statements of income and comprehensive income.

After initial adoption, Management will monitor debt instruments for significant events that affect fair value of future cash flows. Significant events may include amendments, large debt repayments, or large draws on the debt instrument. Fair value changes may positively or negatively impact the consolidated statements of income and comprehensive income.

IFRS 15 - Revenue from Contracts with Customers

Revenue contracts are accounted for using the cumulative effect method starting January 1, 2018, with no restatement of comparative periods. Services are based upon orders that include fixed or determinable prices based upon daily, monthly or contracted rates generally with no post-service obligations. Revenue recognition is achieved over time as performance obligations are delivered. The new policy had no impact on the fiscal year ended December 31, 2017, or the results of operations for the current period ended March 31, 2018.

4. Financial instruments and risk management

(a) Fair value of financial instruments

The estimated fair value of the Company's financial instruments approximates the amount for which the financial instrument could currently be exchanged in an arm's length transaction between willing parties who are under no compulsion to act. The carrying value of trade and other receivables, deposits and trade and other payables, approximate fair value because of the near term to maturity of these instruments. The fair value of loans and borrowings is a level 2 measurement and are based on discounted future cash flows using the rates that reflect observable current market rates for similar instruments with similar terms and conditions. The estimated fair value approximates the carrying value at March 31, 2018.

The carrying amounts presented in the statement of financial position relate to the following categories of assets and liabilities:

		March 31, 2018		December 31, 2017
Financial assets				
Cash and cash equivalents	**$**	**607,497**	$	1,291,785
Trade and other receivables	**$**	**10,843,691**	$	11,493,447
Deposits	**$**	**62,988**	$	102,623
Financial liabilities				
Trade and other payables	**$**	**2,163,989**	$	2,527,364
Loans and borrowings	**$**	**6,257,153**	$	22,133,931

Financial risk management

The Company's activities expose it to a variety of financial risks such as credit risk, liquidity risk and market risk. The Board of Directors oversees management's establishment and execution of the Company's risk management framework.

(b) Credit risk

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations. The Company is exposed to credit risk through cash and cash equivalents and trade and other receivables. The Company manages the credit risk associated with its cash and cash equivalents by holding its funds in financial institutions with high credit ratings. Credit risk for trade and other receivables are managed through established credit monitoring activities.

The Company has trade receivables from customers in the utilities/infrastructure construction industry, as well as customers in the oil and gas industry. Credit risk is mitigated due to significant customers being large industry leaders, following a program of credit evaluation and limiting the amount of customer credit where deemed necessary. The Company monitors trade receivables monthly to identify any amounts which are past due and considers if they are impaired. This assessment is done on an invoice by invoice basis. Losses from trade accounts receivable have not historically been significant. The Company has recorded a provision for doubtful accounts at March 31, 2018, of $24,245 (December 31, 2017 - $172,000).

At March 31, 2018, $1,808,000 or 27% of trade receivables was from two customers compared to $1,804,000 or 19% from two customers as at December 31, 2017.

	March 31, 2018	December 31, 2017
Current (less than 90 days)	**$ 9,863,494**	$ 10,946,163
Past due (more than 90 days)	**980,197**	547,284
Total	**$ 10,843,691**	$ 11,493,447

Included in trade receivables past due (more than 90 days) is $nil (December 31, 2017 - $nil) of holdback receivables.

(c) Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations. On an ongoing basis the Company manages liquidity risk by maintaining adequate cash and cash equivalents balances and appropriately utilizing available lines of credit. Management believes that forecasted cash flows from operating activities, along with available lines of credit, will provide sufficient cash requirements to cover the Company's forecasted normal operating activities, commitments and capital expenditures. For the three months ended March 31, 2018, the Company generated 23% of revenue from one customer (2017 - 38% from two customers.) No other customers comprise more than 10% of revenues.

The following are undiscounted contractual maturities of financial liabilities, including estimated interest at March 31, 2018, and December 31, 2017:

At March 31, 2018, $268,000 in operating lease payments were expensed during the period (2017 - $274,850).

(d) Market risk

Market risk is the risk of changes in market prices, such as interest rates, which will affect the Company's income or the value of its financial instruments. Management has assessed the effect of a 1% interest rate increase or decrease in the prime lending rate at March 31, 2018, to impact the Company's annual interest expense by approximately $60,000 (December 31, 2017 - $218,000). The Company has not entered into any derivative agreements to mitigate this risk.

Capital management

The primary objective of capital management is to ensure the Company has sufficient capital to support its business and maximize shareholder value. The Company manages its capital in proportion to the risk of the underlying assets and makes adjustments in light of changes in economic conditions and risks. The Company's strategy remains unchanged from prior periods. Management considers its capital structure to include funded debt and adjusted capital of the Company. Adjusted capital comprises all components of equity (share capital, contributed surplus, warrants and deficit). Included in funded debt is the bank loan facility which requires the Company to maintain certain financial covenants as defined below. The Company's objectives when managing capital are to finance its operations and growth strategies and to provide an adequate return to its shareholders. In order to maintain or adjust the capital structure, the Company may issue new shares, or sell assets to reduce debt. As at March 31, 2018, the Company has met these objectives.

	March 31, 2018	December 31, 2017
Bank loan	**$ 4,804,344**	$ 20,424,199
Current portion of long-term debt	**254,933**	398,952

Shareholders' equity	**54,576,299**	51,991,778
Total capital	**$ 60,833,452**	$ 74,125,709

Included in net funded debt is the bank loan facility which requires the Company to maintain certain financial covenants.

"Fixed Charge Coverage Ratio" - EBITDA less unfinanced capital expenditures, less taxes paid divided by fixed charges.

"Senior Leverage Ratio" - the result of the amount of Senior Funded Debt of the Company and its subsidiaries on a consolidated basis, to the trailing twelve month EBITDA for the 12 month period ended as of such date.

"EBITDA" - earnings before finance expense, taxes, depreciation and amortization, loss (gain) on disposal of property, plant and equipment, fair value adjustments, impairment losses and share-based payments.

The Company's covenants are as follows:

	March 31, 2018	**Required**	December 31, 2017	Required
Fixed charge coverage ratio	**2.49**	> 1.25	2.49	> 1.25

Net capital expenditure	**$(15,127,871)**	< $1,125,000	$1,022,057	< $1,125,000

The minimum covenants are noted in the table above. The Company monitors these requirements on an ongoing basis and reports on its compliance to its lender on a monthly basis. As at March 31, 2018, the Company is in compliance with all covenants.

Fair value determination

A number of the Company’s accounting policies and disclosures require the determination of fair value, for both financial and non-financial assets and liabilities. When applicable, further information about the assumptions made in determining fair values is disclosed in the notes specific to that asset or liability.

On August 11, 2016, the facility had a significant amendment to future cash flows in which the interest rate was amended to prime plus 3.0% from prime plus 2.0%.
